E-mail	-	
Telephone	041-590-5400	
Fax	82-41-590-5499	
Exhibitor Introduction	Duksan Neolux specializes in developing OLED materials for displays. Through continuous investment in R&D and manufacturing, as well as ongoing technological advancements, the company has been at the forefront of the OLED materials industry while expanding into next-generation materials, such as conductive particles, photoresists, and PSPI materials. By diversifying its product portfolio and enhancing material performance, the company is not only driving advancements in OLED materials technology but also expanding into markets for high-performance advanced materials.	
Exhibit Description	Duksan Neolux will showcase its technological expertise and competitive edge by presenting its advanced conductive particles, photoresists, PSPI materials, and OLED materials.	
Exhibit Product	Conductive Particles, Photoresists, PSPI (Photosensitive Polyimides) Materials, Organic Light Emitting Diodes (OLED) Materials
