Exhibitor Introduction	**Innovation meets precision** **Admesy, your partner for all spectral, color and light measurements** At Admesy, we specialize in providing state-of-the-art color measurement products and solutions, suited for both display measurements and analytical applications. Our innovative solutions are designed to deliver unparalleled accuracy and consistency, ensuring your color standards are met with precision. Built to endure the demands of various industries, our spectrometers, colorimeters, light meters and 2D imaging colorimeters are engineered for long-term reliability and performance.	

	Trust Admesy for your color measurement needs and experience the pinnacle of quality and dependability. Company Facts & Figures - Founded in 2006 by former Philips engineers - Headquarter in the Netherlands - Offices in Germany, Korea, China and Japan - R&D Manufacturing and clean room in the Netherlands - Satisfied customer base all over the world - Steadily inventing and growing
Exhibit Description	Admesy's award-winning Prometheus series has been setting the standard for colorimetry since its launch in 2021. This year the series has been extended with the second generation Prometheus colorimeter series: The PCM2 series. It's the perfect solution for the most accurate and at the same time fastest display measurement possible; seen in action this august at IMID.

Exhibit Product	**PCM2 Series | colorimeter** **Prometheus Series | colorimeter, spectrometer and light meter** **Helios series | 2D imaging**

Neo series | spectroradiometer

Asteria series | light meter
