Exhibitor Introduction	Software for Chemistry & Materials (SCM) is an Amsterdam-based chemical software company with partners active in academia, government labs and industry. Advanced atomistic and multi-scale modeling in our flagship Amsterdam Modeling Suite (AMS) has improved materials for batteries, OLEDs, semiconductors, polymers and more. With our passionate team of developers, we are always working on making the best tools to assist your R&D team.	
Exhibit Description	Accelerate your R&D using our OLED simulation suite! • Model the full OLED stack with **Bumblebee** by tracking carrier diffusion, molecular emissions and device degradation over time. • Screen OLED molecules and layer morphologies using the **Amsterdam Modeling Suite (AMS)**. • Seamless integration and an easy-to-use graphical interface get you started right away.	

Exhibit Product	Bumblebee: The OLED device simulation software
