
Session Title:	39. Organic/Perovskite Photovoltaics
Date:	Aug. 25, 2016 (Thursday)
Time:	08:30~10:10
Room	Room G (Room 401)
Session Chair	Prof. Yu-Lun Chueh (National Tsing Hua Univ., Taiwan)

G39-1

08:30~08:55

[Invited] Design Strategy of Organic Semiconductor for Organic Photovoltaics

Yun-Hi Kim (Gyeongsang Nat'l Univ., Korea)

G39-2

08:55~09:20

[Invited] Regioregular Donor-Acceptor Copolymers for High-Efficiency Organic Solar Cells

Youngu Lee (DGIST, Korea)

G39-3

09:20~09:45

[Invited] Low-Temperature-Processed TiO₂ Films for Flexible Perovskite Solar Cells

Sangwook Lee (Kyungpook Nat'l Univ., Korea), Seung Lee Kwon, and Hyun Suk Jung (Sungkyunkwan Univ., Korea)

G39-4

09:45~10:10

[Invited] Solar Cells Development of Conductive Polymers for High Efficiency Organicbased Solar Cells with High Long-term Stability

Jea Woong Jo, Myung-Seok Seo, Min Jae Ko, and Hae Jung Son (KIST, Korea)
