Exhibitor Introduction (Within 200 words)	<p>BSP is a new-type company devoting the development and the supplyment of new business solutions in flexible display industry. Nowadays we are focused on the new processes which are very critical for the flexible OLED display and the flexible OLED lighting. Firstly, we can solve many problems relating with the laser technology. Secondly, we can supply a new solution for the lift-off process. And Finally, we can also provide a new-type solution for a making electrode without lithographic process. So we constructed and kept the infrastructure for tests and evaluations of these new processes in order to meet our customer's requirements.</p>
Exhibit Description (Within 200 wors)	<p>In this IMID, we want to display our new solutions for the flexible OLED display and the flexible OLED lighting. Exhibition items are as-follows :</p> <ol style="list-style-type: none"> 1. Intense pulse lighting system for fabrication of the flexibile electrode 2. Laser ablation technology for the electrode opening 3. Direct laser welding and cutting technology 4. Film cutting solution using laser equipment 5. Alternative technology for the lift-off process for the flexible devices
