<b>Email</b>	sbkwon@ndis.co.kr
<b>Homepage</b>	<a href="http://www.ndis.co.kr">www.ndis.co.kr</a>
<b>Exhibitor Introduction (Within 200 words)</b>	<p>NDIS corporation has developed innovative technologies for robust flexible LCDs and glasses-free 3D displays since 2004. Vivid color e-papers, transparent-reflective switchable displays and multi-function flexible displays have been achieved through unique material formulation and cost-effective manufacturing process technologies.</p> <p>e-readers, e-signage, e-POP, ESL, card displays, smart windows, and other outdoor reflective displays are targeting flexible display applications, which require the low power consumption and vivid color properties in general. The frontier companys who can make a profitable new business using our display modules are welcome anytime.</p>
<b>Exhibit Description (Within 200 words)</b>	<p>Color e-papers that are shown in this exhibition have the distinct features as follows:</p> <ul style="list-style-type: none"> <li>■ Bistable and reflective → extremely low power consumption</li> <li>■ High color gamut and reflectivity → vivid color</li> <li>■ Thin plastic substrate used and cell gap stabilization by PIPS → flexible</li> <li>■ Simplified fabrication process based on coating and printing method → low cost</li> </ul>
<b>Exhibit Product</b>	Color e-Papers with sizes of 2.9, 5.1, 12.1 ans 24 inch
