

iMID 2017

August 28 - 31, 2017 / BEXCO, Busan, Korea

Company Name	ISAC Research
Address	340 Techno 2 ro, Yuseong-gu, Daejeon, Korea
President	Hyung Sang Park
Tel	070-8810-4200
FAX	042-671-7667
Email	info@isacresearch.com
Homepage	www.isacresearch.com
Exhibitor Introduction (Within 200 words)	<p>ISAC Research, inc. specialized in thin film deposition equipment for industrial applications, is the company founded by the experts who consider the service to the customer is the highest value to pursue. Our customers are all who are always looking for new values in their business. Our job is to provide the equipment which is in need in the field of production and R&D through the optimization of the performance to fit to the customers' needs from the beginning of the development. We will grow to a good company that makes the new values together with the customer.</p>
Exhibit Description (Within 200 words)	<p>ISAC products high performance atomic layer deposition systems which can handle various types of substrate. This uniquely designed ALD systems by ISAC will increase the efficiency of the user's R&D performance. ALD systems by ISAC enables you to develop the new ALD process very effectively. Maximum 5 liquid liquid/solid precursors installation with 2 gas type reactants will bring the flexibility of the process development especially in multi compositional thin film development. Considering the variant combination of the processes and materials at the R&D stages, ALD system is designed to cope with the researcher's specific requirements which are different from one another.</p> <p>APPLICATIONS Oxides, High-k dielectrics, Metals, Multilayer composites</p>
Exhibit Product	Atomic layer deposition systems Industrial & Advanced coating service
