

iMID 2017

August 28 - 31, 2017 / BEXCO, Busan, Korea

Company Name	Material Science Co.,Ltd
Address	#805 , 196, Gasan digital 1-ro, Geumcheon-gu, Seoul, Korea
President	Soon Chang Lee
Tel	82-2-6259-0113
FAX	82-2-6259-0130
Email	lhquan@material-science.co.kr
Homepage	http://www.material-science.co.kr
Exhibitor Introduction (Within 200 words)	<p>Material Science provides only top-quality products and services on a basis of its distinctive technologies applied to the whole process of manufacturing OLED materials, from production to final inspections. To better response to the rapid global display market changing, our proud and brilliant researchers and engineers have fully focused on developing OLED materials. Now based on our own know-how and technologies, we are ready to offer excellent-quality and competitive products.</p> <p>Under the business circumstances shifting day by day, all members of the company have shared efforts in making self-innovations, technological development and a critical course to create a new future for all.</p> <p>Under the vision of a "Small but Strong, Innovative and Profit Sharing Company", Material Science will never stop its journey to become a world-class player in the OLED field.</p>
Exhibit Description (Within 200 words)	<p>OLEDs are used in the mass production of AMOLED panels, including the red, green, and blue (RGB) light-emitting materials. The materials of the common layers include hole transport layer (HTL), electron transport layer (ETL), and a capping layer (CPL), along with other functional materials. IMID 2017 offers the opportunity to obtain information about new products and new technology of innovations, enter into an exchange and to maintain and develop valuable contacts.</p>
Exhibit Product	OLED materials
