| Exhibitor Introduction | <p>ISSOFT's high-performance optical analysis hardware and software are widely and effectively utilized in the display industry for optimization of production processes and product inspection.</p> <p>The ISSOFT provides customers with accurate and unique solutions for optical measurement solutions (cameras). Based on our proprietary technology accumulated over 15 years, we dominate the market for optical measuring instruments (cameras) in the automotive lighting and display markets.</p> <p>In addition, we do not stop at simple product sales with many clients with whom we have been related for more than 10 years but are closely collaborating through the development of theories and evaluation methods for them.</p> <p>For customer satisfaction after sale We perform tasks such as software development, optical theory education, equipment technology education, measurement support, and facility follow-up management.</p> |  |
| Exhibit Description    | LMK(Luminance Measuring Camera) is a CMOS camera-based image luminance measuring system that enables simultaneous photometric and colorimetric measurements.   |  |
| Exhibit Product        | LMK 6, LMK Position  |  |
